

TEST COMPLETION REPORT · MOBILE REGRESSION · IOS & ANDROID

Concert Technologies Field Technicians App (iOS & Android) – Test Completion Report

INTERNAL

● NO UNEXPECTED FAILURES

The verdict is the worse of the two platforms'. iOS: No unexpected failures — 0 unexpected, 5 red tests held by known defects, 4 could not run. Android: No unexpected failures — 0 unexpected, 10 red tests held by known defects, 1 could not run.

Checklist now (each platform's reported run): **iOS** 449 green, 6 red with a known cause, 7 blocked, 0 red and unexplained · **Android** 482 green, 12 red with a known cause, 3 blocked, 0 red and unexplained · **passed on both** 447 of 645.

Document. Version of 2026-10-02 (iOS run of 2026-09-28 and Android run of 2026-10-02) · Source: <automation/mobile/reports/all/internal/index.html> · Online: <https://claude.ai/artifact/Vh4DJSdzZmaGH7fwRMUbde> · PDF: [ConcertTechnologies_FieldsTechnicians_Mobile_TestCompletionReport_INTERNAL_2026-10-02.pdf](#) · Confidential, TRIARE internal.

Summary

Both platforms run the same QA checklist of **645** checks across 12 modules against the same app build. **iOS**: 462 automated (72%), **449** passed, 6 red with a known cause, 7 could not run (run of 28 September 2026). **Android**: 497 automated (77%), **482** passed, 12 red with a known cause, 3 could not run (run of 2 October 2026). **447** checks passed on both platforms.

482

passed on Android · of
497 automated

447

passed on both
platforms

By platform

PLATFORM	CHECKS	AUTOMATED	PASSED	HELD RED	BLOCKED	NOT AUTOMATED	VERDICT
iOS	645	462	449	6	7	183	● NO UNEXPECTED FAILURES
Android	645	497	482	12	3	148	● NO UNEXPECTED FAILURES
Total	1290	959	931	18	10	331	● NO UNEXPECTED FAILURES

The total counts each check once per platform (645 × 2); a check passes for the app only when it passed on both: 447 of 645. Every number opens the platform report.

What needs a decision

- The priority of 7 open defects is QA's proposal — the owner / PM decide: [BUG-AUTH-001](#), [BUG-AUTH-002](#), [BUG-AUTH-003](#), [BUG-ORDL-001](#), [BUG-ORDL-003](#), [BUG-SPL-001](#), [BUG-SPL-002](#)

By module

MODULE	CHECKS	IOS PASSED / AUTOMATED	IOS HELD RED	ANDROID PASSED / AUTOMATED	ANDROID HELD RED	PASSED ON BOTH

A module opens every check with its verdict on each platform; a platform's number opens that platform's module page (every test, step and screen).

Open defects · 8

DEFECT	MODULE	WHAT IS WRONG	PLATFORM	SEVERITY	PRIORITY	CHECKS HELD RED
BUG-AUTH-001	02 · Authentication	Login with an unregistered phone number shows a generic error instead of "not registered"	Both	S3 minor	P3 proposed	iOS: AUTH-122 Android: AUTH-122
BUG-AUTH-003	02 · Authentication	After a connection error on the code screen, Verify does nothing until a digit is changed	Android	S3 minor	P2 proposed	Android: AUTH-099 , AUTH-100
BUG-ORDL-001	03 · Order list	The weekly calendar keeps showing "No jobs" for jobs the refreshed Jobs list already shows	Both	S3 minor	P3 proposed	iOS: ORDL-070 Android: ORDL-070

DEFECT	MODULE	WHAT IS WRONG	PLATFORM	SEVERITY	PRIORITY	CHECKS HELD RED
BUG-ORDL-002	03 · Order list	The Jobs list is ordered by when a job was created, not by its scheduled date	Both	S3 minor	P4	iOS: ORDL-069 Android: ORDL-069
BUG-ORDL-003	03 · Order list	"Updated" stays on a job after its details were opened, until the calendar is refreshed	Both	S3 minor	P3 proposed	iOS: ORDL-022 , ORDL-056 Android: ORDL-022 , ORDL-056
BUG-SPL-001	01 · Splash	A deleted account stays signed in: the app keeps opening the Jobs list and the profile after a cold start	Both	S3 minor	P2 proposed	iOS: SPL-009 Android: SPL-009
BUG-AUTH-002	02 · Authentication	Registration caps first and last name at 50 characters while the SRS allows 100	iOS	S4 cosmetic	P4 proposed	—
BUG-SPL-002	01 · Splash	Android: the system Back on the splash screen leaves the app	Android	S4 cosmetic	P3 proposed	Android: SPL-007

Known, not filed · 3

The owner triaged these as the app's behaviour and decided not to file them; their tests stay red and count as held red by a known defect.

DRAFT	MODULE	WHAT IS WRONG	PLATFORM	CHECKS HELD RED
BUG-PHR-001	09 · Photo report	A photo deleted from the Photo report stays on the job on the server	Android	Android: PHR-050
BUG-NOTE-001	10 · Notes	Editing or deleting a note never reaches the server; each new note replaces the job's notes there	Android	Android: NOTE-047
BUG-NOTE-002	10 · Notes	A note created and then edited offline is not synced when the connection returns; it waits for the submission	Android	Android: NOTE-045

Could not run · 5

PLATFORM	TEST	WHY
ios	TC-ORDD-004 Tapping the PF phone opens the dialer with the number	iOS simulator limitation — there is no Phone app, the tap cannot open a dialer (owner, 2026-09-24, Q-ORDD-3). Runs in full on the Android emulator.
ios	TC-ORDL-012 Mismatch dialog: Cancel keeps the session, Log out ends it	iOS simulator testing specific — the mismatch dialog closes by itself ~0.6 s after it appears (recon 4, 4 of 4); on a device it stays until a button is tapped (owner, 2026-09-24, Q-ORDL-8). Runs in full on Android.
ios	TC-ORDP-006 The PF phone on the In progress screen opens the dialer	iOS simulator limitation — there is no Phone app, the tap cannot open a dialer (owner, 2026-09-24, as Q-ORDD-3). Runs in full on the Android emulator.
ios	TC-DLV-004 The app's reaction to a successful submission: 'Deliverables sent to review successfully'. 'Successful', then Check out, locked at once	DEV answers POST /job/{id}/submit with 500 although the submission is recorded (COPS; owner, Q-DLV-5, 2026-09-26) — the app shows 'Server error. Try again later.', so its reaction to a successful submission cannot be observed

PLATFORM	TEST	WHY
Android	TC-DLV-004 The app's reaction to a successful submission: 'Deliverables sent to review successfully'. 'Successful', then Check out, locked at once	DEV answers POST /job/{id}/submit with 500 although the submission is recorded (COPS; owner, Q-DLV-5, 2026-09-26) – the app shows 'Server error. Try again later.', so its reaction to a successful submission cannot be observed

Why checks are not automated · iOS 183 / Android 148

REASON	IOS	ANDROID
Deferred – can be automated later	36	36
Kept manual by the owner	32	32
A person's check	24	24
Offline – waits for the Android stage	36	–
Beyond the emulator / simulator or outside the app	15	15
The app works differently – accepted	15	15
Failures a test cannot cause	10	10
Not observable from the app on DEV	9	9
Requirement unclear or a placeholder	3	3
Load on DEV excluded	2	2
Covered by another check	1	1
Skipped by the owner on Android	–	1

Each platform's records: [qa/mobile/ios/not-automated.md](#) ,
[qa/mobile/android/not-automated.md](#) ; every check with its reason is in the platform reports' technical detail.

Exit criteria

CRITERION	IOS	ANDROID	DETAIL
Every planned test executed	No	No	iOS: 124 tests, 4 could not run (section 4) · Android: 149 tests, 1 could not run (section 4)

CRITERION	IOS	ANDROID	DETAIL
No unexpected test failure	Yes	Yes	iOS: 0 unexpected · Android: 0 unexpected
Every red check has a known cause	Yes	Yes	iOS: 0 unexplained · Android: 0 unexplained
No open critical defect	Yes	Yes	iOS: 0 open · Android: 0 open
No open major defect	Yes	Yes	iOS: 0 open · Android: 0 open; 2 major-severity behaviours accepted by the product owner (section 6)
P0 devices of the device matrix covered	Yes	Yes	iOS: all covered · Android: all covered

Run history

PLATFORM	RUN	FINISHED (UTC)	HARNESS	TESTS	RED	BLOCKED	UNEXPECTED	CHECKS PASSED
iOS	final-1	2026-09-27 11:15	a9b20d4	124	7	4	2	430
iOS	final-2	2026-09-27 13:13	e4abaf8	124	6	4	1	435
iOS	stable-1	2026-09-28 01:17	7673885 (uncommitted changes)	124	5	4	0	449
iOS	stable-2	2026-09-28 02:45	886de04	124	5	4	0	449
iOS	stable-3 (reported)	2026-09-28 04:13	886de04	124	5	4	0	449
Android	2026-10-02-final-u1	2026-10-02 14:20	9101eb7	149	10	2	0	481

PLATFORM	RUN	FINISHED (UTC)	HARNESS	TESTS	RED	BLOCKED	UNEXPECTED	CHECKS PASSED
Android	2026-10-02-final-u2	2026-10-02 17:07	9101eb7	149	10	1	0	482
Android	2026-10-02-final-u3 (reported)	2026-10-02 19:55	9101eb7	149	10	1	0	482

final-1 and final-2 were earlier attempts at the final run: the red there beyond the filed defects came from harness defects, each fixed before the series restarted. stable-1...3 ran the same harness code, 7015c46. u1-u3 ran the same harness code, 9101eb7: u2 and u3 identical per test; u1 differs only in TC-SPL-006 (Blocked — the ~1 s splash was missed). Earlier attempts stopped on environment faults (a System UI hang, the Mac's time zone flip), fixed in the harness before u1.

How this report is built

- Numbers: each platform's reported run (setup/project.yaml → report.mobile.slices), read the same way as the platform reports – nothing here is computed differently.
- Verdict: the worse of the two platforms'. A check passes for the app only when it passed on both.
- Tools versions: as installed on the QA machine when the report was built.
- This page: `automation/tools/mobile_combined_report.py` ; all reports at once: `automation/tools/mobile_reports.py` .

Where to look

- iOS: [the iOS report](#) – every check, test, step and screen; traceability `qa/mobile/ios/final-traceability.md` .
- Android: [the Android report](#) – every check, test, step and screen; traceability `qa/mobile/android/final-traceability.md` .
- Owner rulings: `docs/notes/decisions.md` .

Generated by `automation/tools/mobile_combined_report.py` , 2026-10-05 12:36 UTC, from the platform runs, the checklists, the bug reports and the reasons files.
