

TEST COMPLETION REPORT · MOBILE REGRESSION · IOS & ANDROID

# Concert Technologies Field Technicians App (iOS & Android) – Test Completion Report

**INTERNAL** • NO UNEXPECTED FAILURES

The verdict is the worse of the two platforms'. iOS: No unexpected failures — 0 unexpected, 5 red tests held by known defects, 4 could not run. Android: No unexpected failures — 0 unexpected, 10 red tests held by known defects, 1 could not run.

**Checklist now** (each platform's reported run): **iOS** 449 green, 6 red with a known cause, 7 blocked, 0 red and unexplained · **Android** 482 green, 12 red with a known cause, 3 blocked, 0 red and unexplained · **passed on both** 447 of 645.

## Summary

Both platforms run the same QA checklist of **645** checks across 12 modules against the same app build. **iOS**: 462 automated (72%), **449** passed, 6 red with a known cause, 7 could not run (run of 28 September 2026). **Android**: 497 automated (77%), **482** passed, 12 red with a known cause, 3 could not run (run of 2 October 2026). **447** checks passed on both platforms.

**645**  
 checks in the QA checklist

**449**  
 passed on iOS · of 462 automated

**482**  
 passed on Android · of 497 automated

**447**  
 passed on both platforms

## By platform

final-1 and final-2 were earlier attempts at the final run: the red there beyond the filed defects came from harness defects, each fixed before the series restarted. stable-1...3 ran the same harness code, 7015c46. u1-u3 ran the same harness code, 9101eb7: u2 and u3 identical per test; u1 differs only in TC-SPL-006 (Blocked — the ~1 s splash was missed). Earlier attempts stopped on environment faults (a System UI hang, the Mac's time zone flip), fixed in the harness before u1.

## How this report is built

- Numbers: each platform's reported run (setup/project.yaml → report.slices), read the same way as the platform reports – nothing here is computed differently.
- Verdict: the worse of the two platforms'. A check passes for the app only when it passed on both.
- Tools versions: as installed on the QA machine when the report was built.
- This page:  
automation/tools/mobile\_report.py ; all reports at once:  
automation/tools/build\_reports.py .

## Where to look

- iOS: the iOS report – every check, test, step and screen; traceability qa/mobile/ios/final-traceability.md .
- Android: the Android report – every check, test, step and screen; traceability qa/mobile/android/final-traceability.md .
- Owner rulings: docs/notes/decisions.md .

Generated by automation/tools/mobile\_report.py , 2026-10-05 08:11 UTC, from the platform runs, the checklists, the bug reports and the reasons files.
